

Community Made Math

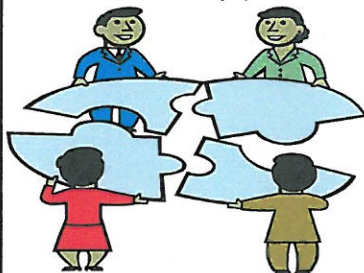

Do you have a real life math scenario that you have had to solve in your workplace or home?

Are you willing to share?

Jacksonville School District 117 is looking to enhance the K-12 math curriculum. The District is inviting community members to submit "real life" math story problems for use in the classrooms. Students will be challenged to work the problems and make connections from the student desk to the real world. Your input would directly impact the preparedness of students for the workplace and life!

Math Problem/Application:

Submitted by (include business name if applicable):

Contact Information:
Suggested Grade Level:

Thank you for helping put the pieces together!

Submit electronically at www.jsd117.org or amiddleton@jsd117.org.

Forms can be submitted to Angie Middleton at Central Office located at 516 Jordan.
